

DATA ANALYTICS PROJECT

Pizza Sales Analysis

A Power BI report rebuilt for Tableau, with an interactive
HTML dashboard

48,620 order lines · 21,350 orders · Jan – Dec 2015

What this project answers

Turn one year of pizza-shop orders into a decision-ready dashboard: when customers order, what they buy, and which products earn their place on the menu.

Tools used

Power BI

Tableau

HTML / JavaScript

Timing

Which days and months are busiest?

Mix

Which categories and sizes drive revenue?

Products

Which pizzas win, and which lag, on revenue, quantity and orders?

The dataset: pizza_sales.csv

48,620

order lines

21,350

orders

32

pizzas

4 / 5

categories / sizes

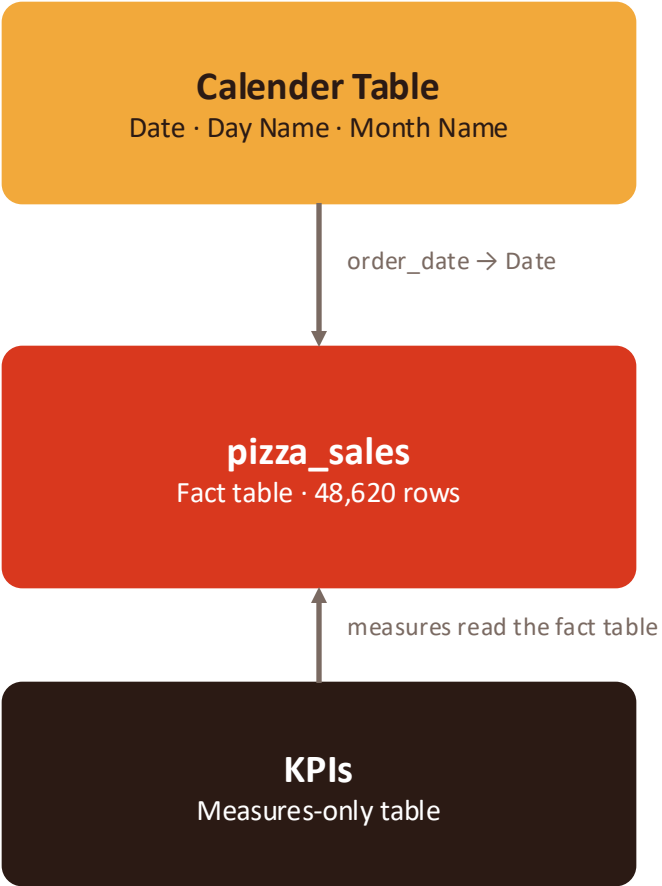

358

trading days

Field	Type	Used for
order_id	Number	Counting distinct orders (Total Order)
order_date	Text, dd-mm-yyyy	Day of week and month; date slicer
pizza_name	Text	32 pizzas — Top / Bottom 5 rankings
pizza_category	Text	Classic, Chicken, Supreme, Veggie
pizza_size	Text	S, M, L, XL, XXL
quantity	Number	Pizzas sold per line (Total Pizza Sold)
unit_price · total_price	Number	Revenue = sum of total_price

Also in the file: pizza_id, pizza_name_id, pizza_ingredients. There is no order-time column.

Data model and KPI definitions

KPI	Definition	Tableau formula
Total Revenue	Sum of total_price	SUM([total_price])
Total Order	Distinct order_id	COUNTD([order_id])
Total Pizza Sold	Sum of quantity	SUM([quantity])
Average Order Value	Revenue ÷ orders	SUM([total_price]) / COUNTD([order_id])
Avg Pizza Per Order	Pizzas ÷ orders	SUM([quantity]) / COUNTD([order_id])

Tableau needs no calendar table: day and month come from the parsed Order Date.

2015 at a glance

\$817.86K

Total Revenue

21.35K

Total Orders

49.57K

Pizzas Sold

\$38.31

Average Order Value

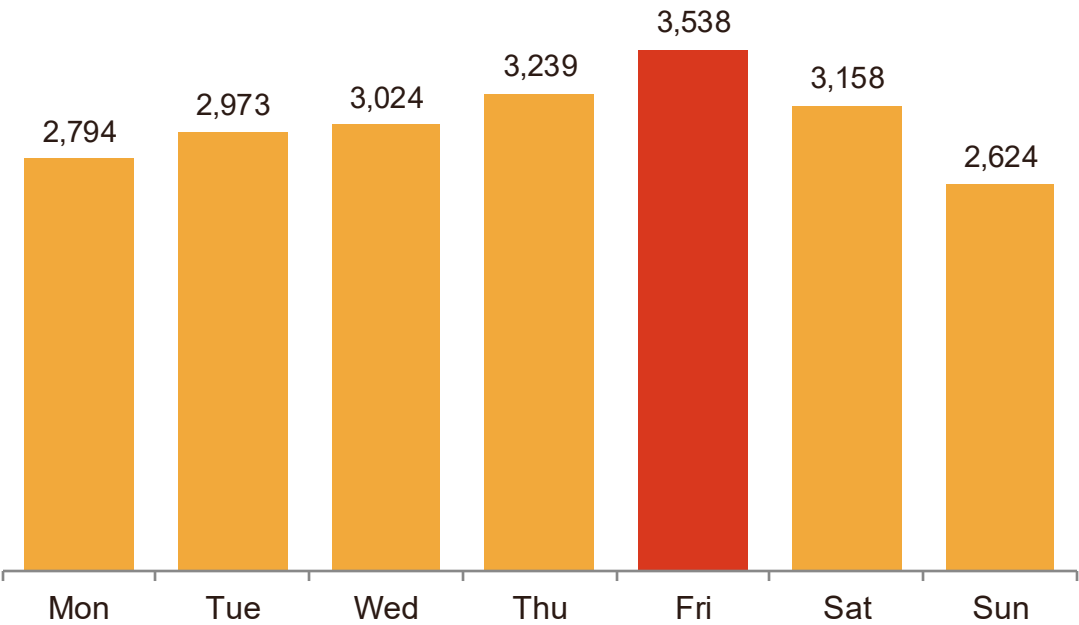

2.32

Pizzas per Order

The average order holds 2.3 pizzas and is worth \$38.31. Across 358 trading days that is about 60 orders and \$2,285 in sales per day.

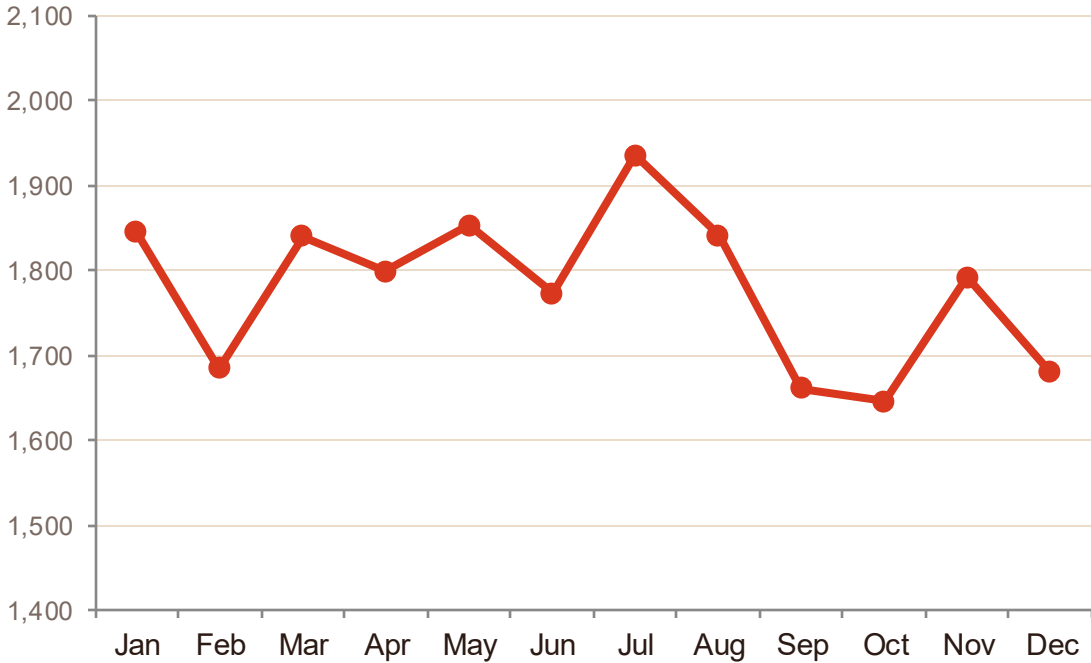

Orders peak on Fridays and in July

Orders by day of week

Friday leads with 3,538 orders (16.6%), 35% more than Sunday. Thursday to Saturday carry 46.5% of all orders.

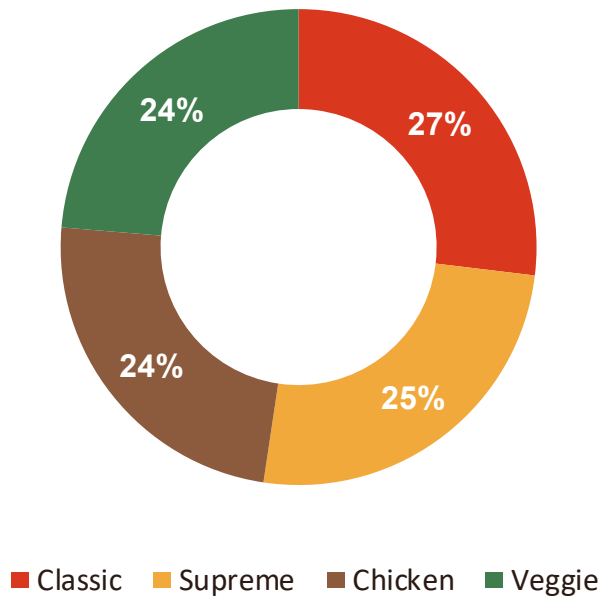

Orders by month (axis starts at 1,400)

July is the busiest month (1,935), then May (1,853). September and October are the quietest (about 1,650).

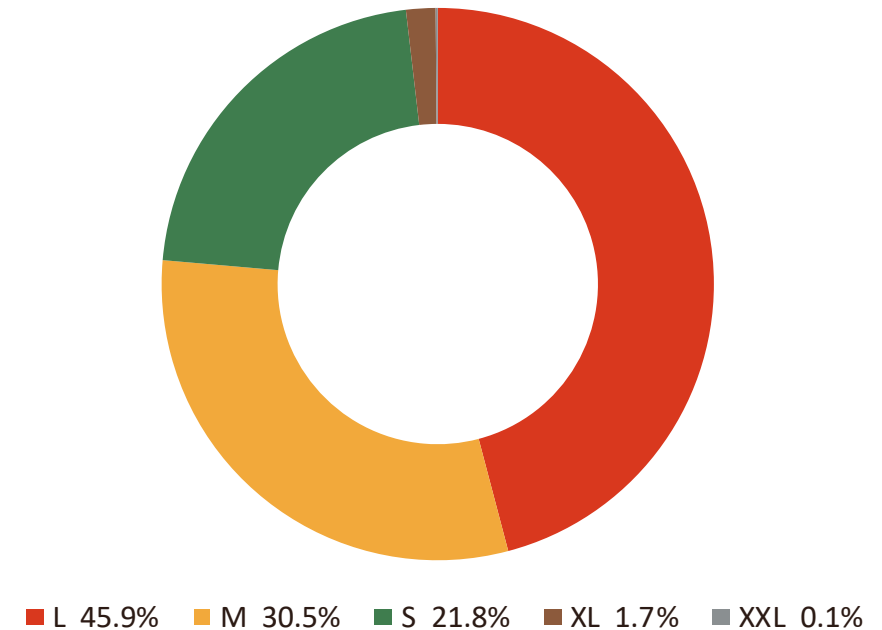

Classic and Large sizes carry the revenue

Revenue by pizza category

Classic earns 26.9% of revenue and 30.0% of pizzas sold. All four categories sit within 3.2 points of each other.

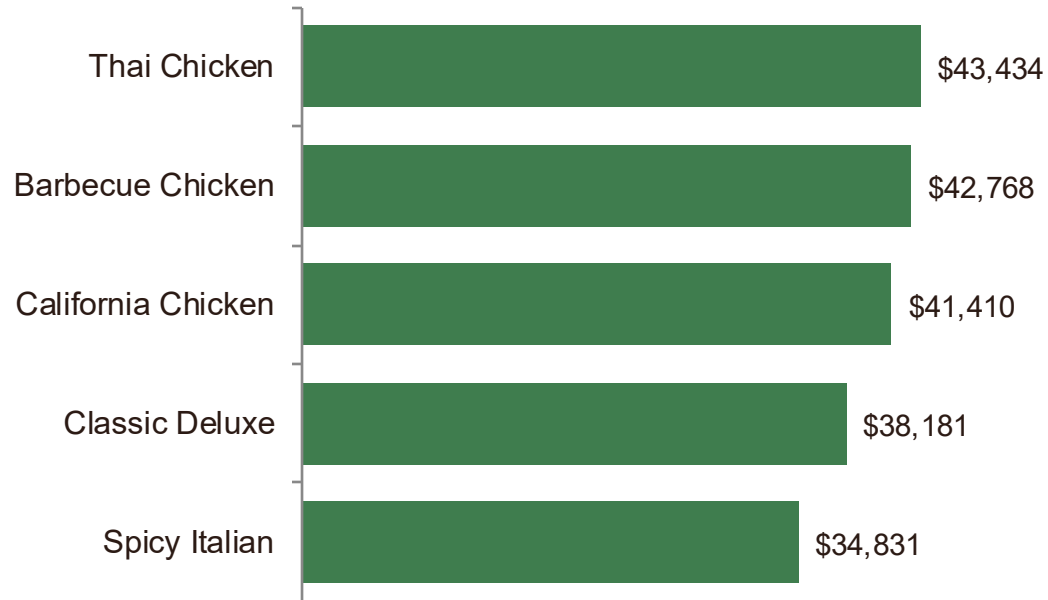

Revenue by pizza size

Large brings 45.9% of revenue from 38.2% of pizzas. XL and XXL add only 1.8% and exist only for The Greek Pizza.

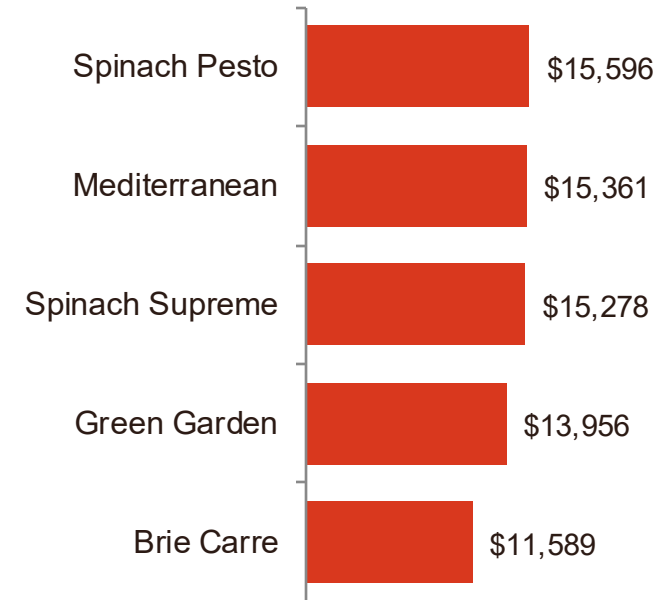

Winners and laggards by revenue

Top 5 pizzas

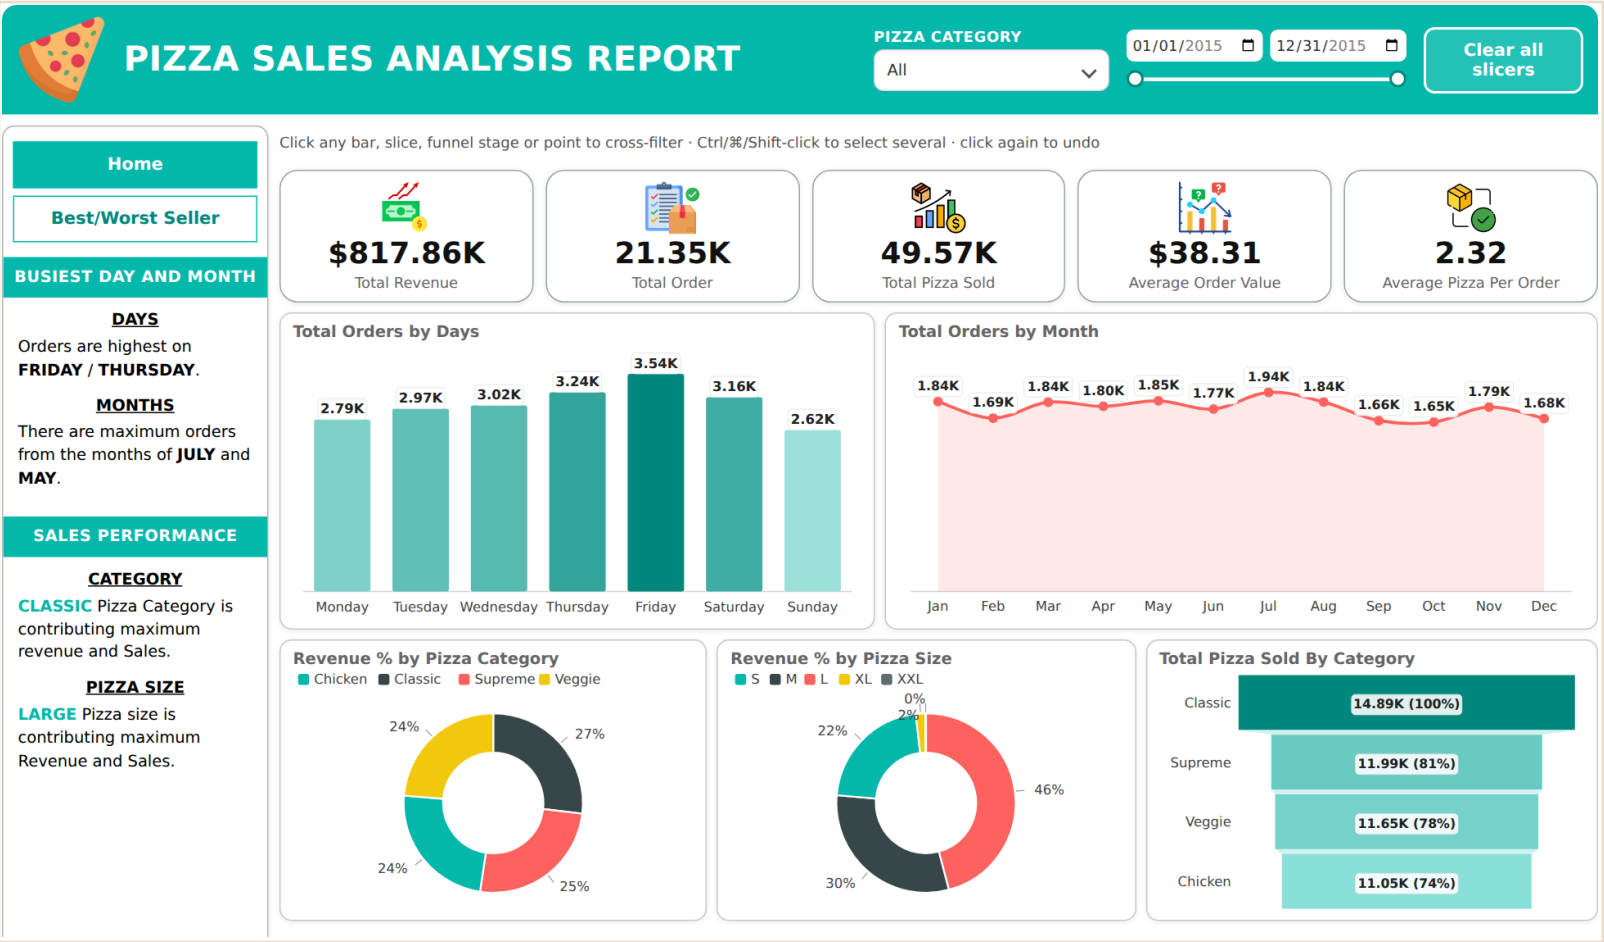

The top 5 earn 24.5% of revenue. Thai Chicken leads on revenue; Classic Deluxe leads on quantity (2,453) and orders (2,329).

Bottom 5 pizzas

The bottom 5 earn 8.8%. Brie Carre is last on revenue, quantity (490) and orders (480), and is sold only as a small at \$23.65.

Home page: KPIs, timing and mix

KPI cards

Revenue, orders, pizzas sold, average order value and pizzas per order.

Timing and mix

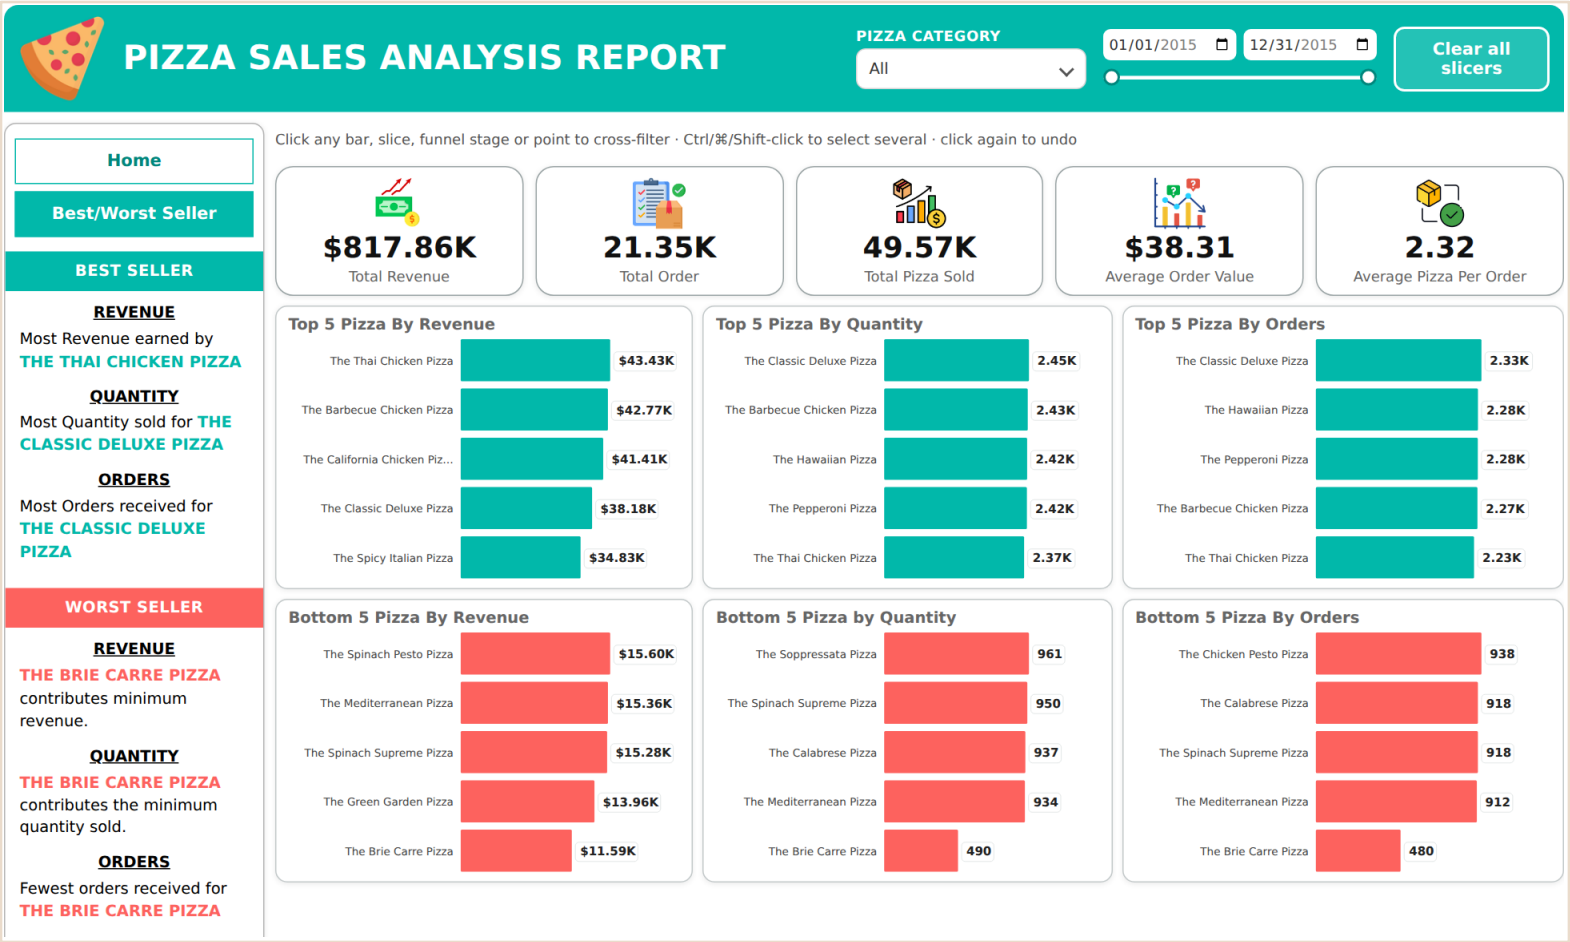

Orders by day and month, revenue by category and size, pizzas sold by category.

Slicers

Pizza category and date range filter every visual on the page.

Screenshot of the interactive HTML dashboard built on pizza_sales.csv

Best/Worst Seller: top and bottom 5

From Power BI to Tableau in five steps

Power BI feature	Tableau equivalent
Slicers	Quick filters (dropdown, date range)
Cross-filtering	"Use as Filter" dashboard actions
Donut chart	Dual-axis pie with a white centre circle
Funnel chart	Centred Gantt bars
Top / Bottom 5 filter	RANK table calculation filter (respects other filters)

Insights and recommended actions

16.6%

Friday share of orders

Thursday to Saturday carry 46.5% of orders.

Action: Plan staffing and dough prep around Thu–Sat.

26.9%

Classic share of revenue

It also sells 30.0% of all pizzas.

Action: Protect the Classic range and use it to anchor bundles.

1.8%

XL + XXL revenue share

Only The Greek Pizza is offered in these sizes.

Action: Check whether these sizes justify their menu space.

1.4%

Brie Carre revenue share

Lowest on all three measures, only sold as a small at \$23.65.

Action: Test a lower price or review it for removal.

Recommendations are suggestions drawn from one year of data and have not been tested.

Project deliverables

Interactive dashboard

HTML file with your data built in. Two pages, slicers and click-to-filter; runs offline in any browser.

Tableau build guide

Markdown cheat sheet: calculated fields, 16 worksheets, dashboard layout, actions and validation numbers.

Summary deck

This presentation: data, KPIs, insights and how the report was rebuilt.

Next steps

Build the sheets in Tableau, check every value against the guide, then publish. Scope: one year of data (2015) and no order-time field, so hourly patterns are not covered.
